Professional Summary

For more than twenty years I've built the technology foundation that lets growing companies scale without scaling cost or complexity, across insurance, legal services, healthcare staffing, financial services, manufacturing, and retail. The work sits where value gets created: consolidating fragmented systems onto one connected platform, integrating acquisitions cleanly, taking out redundant vendor and license spend, and standing up the security and governance that hold up under scrutiny. I work at both ends of the problem, setting strategy in the leadership conversation and going hands-on in the architecture, so the plan and the build are the same thing.

Highlights & Competencies

Platform Consolidation: Collapsed four disconnected systems onto a single Salesforce platform, and a separate ATS and CRM onto one Bullhorn instance, taking roughly \$80K a year out of license and support cost.

M&A Integration: Ran technology through multiple post-acquisition integrations, unifying platforms and data in one to three months per deal without disrupting client-facing operations.

Scale Without Cost: Absorbed user growth from 150 to 500 on a re-architected Microsoft 365 environment, roughly 3x, on the existing team with no added IT headcount.

Cost Takeout: Replaced Dialpad and an outside answering service with Zoom Phone and an automated AI IVR, cutting telephony spend by 90% while improving service.

Program & Project Delivery: PMP-trained portfolio leadership across CRM, ATS, ERP, HRIS, and CLM migrations, delivered through in-house, nearshore, and offshore teams.

Security & Governance: MSSP and endpoint programs, SSO/MFA identity governance, and the acceptable-use, incident-response, and access-control policies behind them. GDPR, PCI DSS, HITRUST, and SOC2.

Professional Experience

Applied Systems

Vice President of End-User Computing

Jul 2026 – Present

- Own the strategy, delivery, and operational excellence of the enterprise collaboration, service management, and communications platforms for a global insurance software leader, with EUC positioned as the organization's primary driver of AI adoption.

Latitude Legal

Senior Director of Technology

Apr 2024 – Jun 2026

- Directed enterprise technology and a 40+ person distributed organization through rapid growth and four post-acquisition integrations.
- Moved the company off Bullhorn onto one Salesforce platform with Asymbi and an Experience Cloud portal, replacing four disconnected systems and trimming roughly \$80K a year.
- Re-architected a 150 to 500 user Microsoft 365 environment off hosted Exchange, with identity governance, SSO/MFA federation, and a SharePoint intranet built in.
- Built the security program from the ground up: MSSP, endpoint protection, VPN, and the acceptable-use, incident-response, and access-control policies behind it.
- Automated the contract lifecycle with Ironclad wired into Salesforce, and replaced Dialpad plus an answering service with Zoom Phone and an AI IVR, cutting telephony spend 90%.

AlliedUP Cooperative Inc.

Vice President of Technology

Apr 2022 – Apr 2024

- Owned a technology budget above \$1M, managing vendors and the project portfolio across in-house, nearshore, and offshore teams while reducing spend as the business grew.
- Consolidated BlueSky ATS and Salesforce CRM onto one Bullhorn platform, and implemented ADP Workforce Now for payroll, benefits, and HR across a distributed clinical workforce.

- Built Bullhorn Canvas KPI pipelines for executive, board, and grant reporting, replacing manual data pulls with real-time dashboards.

EOSG Resources, LLC

Director of Information Services

Oct 2014 – Apr 2022

- Designed an end-to-end ATS to payroll to ERP integration pipeline that eliminated manual data transfer across roughly 900 active clients.
- Led two ERP migrations, Oracle E-Business to Microsoft Dynamics and NetSuite to Sage Intacct, cutting month-end close from weeks to hours.
- Built and sustained the enterprise stack through eight years of growth, led a 10-person field team, codified company-wide SOPs, and ran an internal MSP advising field-services clients at a CTO level.

Oreq Corporation

Interim Director of Technology (Contract)

Feb 2013 – Apr 2014

- Led a Macola ERP migration connecting manufacturing, procurement, and logistics, with executive dashboards.

Cannon Fabrication, Inc.

Engineering & IT Manager

Jan 2006 – Feb 2013

- Migrated legacy DOS accounting to Sage MAS 300 ERP and moved engineering from AutoCAD to SolidWorks.

Casablanca Fan Company (acquired by Hunter Fan Company)

Senior Data Analyst & IT Manager

Jul 2005 – Nov 2006

- Ran IT infrastructure and built the cross-functional reporting presented in leadership reviews.

Anchor Blue Retail Group

Business Analyst (Contract)

Mar 2005 – Jul 2005

- Helped implement a \$1M inventory and POS system across all retail locations.

ITT Technical Institute

Network & Systems Administrator

Dec 2003 – Mar 2005

- Built a custom student grade tracking database and led a campus network hardware migration.

Education

MBA, Business Information Systems · ITT Technical Institute

B.S., Computer Science, Information Systems Security · ITT Technical Institute

A.S., Computer Science, Computer Network Systems · ITT Technical Institute

Certifications

PMP Training Course · Project Management Institute

Azure Infrastructure Architect · AI Agent Framework · AI Agent Integration · Responsible AI · Microsoft

AI Fundamentals · IBM

Generative AI · Databricks

Agile with Jira · Coursera

BI & Data Reporting · NetSuite

Technical Skills

AI & Automation: Claude · ChatGPT · N8N · Together.AI · GPT agents · LLM integration · AI IVR · Power Automate · Zapier

Platforms: Salesforce · Bullhorn · Asymbl · Avionte · Ironclad · NetSuite · Sage Intacct · MS Dynamics · PrismHR · ADP Workforce Now · Workday · HubSpot
