PROFESSIONAL SUMMARY

For more than twenty years I've built and run the technology behind growing companies, across legal services, healthcare staffing, financial services, manufacturing, retail, and education. I build IT departments that run efficiently and tech stacks that connect cleanly across every part of a business, the platforms people work in along with the budget, vendors, roadmap, and support behind them. I'm comfortable at both ends: setting technology strategy and roadmap in a leadership conversation, then going hands-on in the architecture and integration to make sure it gets built right. The outcome holds wherever I land, technology that runs better, scales further, and lets the organization grow without growing its complexity.

CORE COMPETENCIES

Leadership & Strategy: Technology strategy and roadmap development, IT department build-out and operations, budget and portfolio management, vendor management, leadership of distributed teams

Delivery & Integration: Enterprise platform migrations (CRM · ATS · ERP · HRIS · CLM), systems integration and automation, project and change management

Operations & Service: IT service management (ITIL), process development and SOPs, end-user support, client support, SLA accountability

Governance & Reporting: Security program governance, identity and access management, executive and operational reporting

PROFESSIONAL EXPERIENCE

Latitude Legal

Senior Director of Technology

Apr 2024 – Present

- Moved the company off Bullhorn onto Salesforce with Asymbi and an Experience Cloud candidate portal, putting recruiting, contracts, and client work on one platform instead of four disconnected ones.
- Architected a 150–500 user Microsoft 365 migration off hosted Exchange, with identity governance, SSO/MFA, permissions, and a SharePoint intranet designed in from the start rather than bolted on later.
- Stood up IT service management on Jira Service Management and ServiceNow, with ITIL-based request, incident, and change workflows that raised end-user support across a 40+ person distributed organization.
- Built the security program from the ground up: a dedicated MSSP, endpoint protection, VPN, and the acceptable-use, incident-response, and access-control policies behind it.
- Replaced manual signature workflows with Ironclad CLM wired directly into Salesforce, and put AI to work where it removed real effort, meeting transcription, internal chat, GPT agents, and a Zoom Phone AI IVR that retired Dialpad and an outside answering service.
- Ran technology through four post-acquisition integrations, managing vendors and the project roadmap while unifying platforms and data without disrupting client-facing operations.

AlliedUP Cooperative Inc.

Vice President of Technology

Apr 2022 – Apr 2024

- Consolidated a separate ATS and CRM onto one Bullhorn platform, ending spreadsheet-based recruiting and giving sales and recruiting a single workflow.
- Owned a technology budget above \$1M end to end, managing vendors and the project portfolio across in-house, nearshore, and offshore teams.
- Built Bullhorn Canvas KPI reporting for leadership, the board, and grant stakeholders, replacing manual data pulls with real-time dashboards.
- Implemented ADP Workforce Now and integrated AccuSource background screening into Bullhorn, so onboarding and compliance handoffs to the PEO ran without manual steps.
- Migrated telephony to Zoom Phone, cutting telecom cost while improving call quality and scale.

EOSG Resources, LLC

Director of Information Services

Oct 2014 – Apr 2022

- Built and sustained the enterprise stack through eight years of growth, supporting roughly 900 active clients.

- Designed an end-to-end ATS → payroll → ERP pipeline that eliminated manual data transfer between recruiting, payroll, and finance.
- Led two ERP migrations (Oracle E-Business to Microsoft Dynamics, NetSuite to Sage Intacct) and the Avionte to Bullhorn / PrismHR move, aligning payroll and financial reporting.
- Ran a 10-person admin team, codified SOPs and service-management practices, and operated an internal MSP advising field-services clients at a CTO level.

Oreq Corporation

Interim Director of Technology (Contract)

Feb 2013 – Apr 2014

- Led a Macola ERP migration connecting manufacturing, procurement, and logistics, with Crystal Reports executive dashboards and shop-floor time-tracking that closed labor-visibility gaps.

Cannon Fabrication, Inc.

Engineering & IT Manager

Jan 2006 – Feb 2013

- Migrated legacy DOS accounting to Sage MAS 300 across manufacturing and distribution, and moved engineering from AutoCAD to SolidWorks with tighter ties into ERP and production.

Casablanca Fan Company (acquired by Hunter Fan Company)

Senior Data Analyst & IT Manager

Jul 2005 – Nov 2006

- Ran IT infrastructure (VoIP, Active Directory, Exchange) and built cross-functional executive reporting presented in leadership reviews.

Anchor Blue Retail Group

Business Analyst (Contract)

Mar 2005 – Jul 2005

- Helped implement a \$1M inventory and POS system across all retail locations and built the internal IT support ticketing system.

ITT Technical Institute

Network & Systems Administrator

Dec 2003 – Mar 2005

- Built a custom student-grade-tracking database to replace a manual process and led a campus network hardware migration without disrupting students or faculty.

EDUCATION

MBA, Business Information Systems — ITT Technical Institute

B.S., Computer Science — Information Systems Security — ITT Technical Institute

A.S., Computer Science — Computer Network Systems — ITT Technical Institute

CERTIFICATIONS

PMP Training Course — Project Management Institute

Azure Infrastructure Architect · AI Agent Framework · AI Agent Integration · Responsible AI — Microsoft

Agile with Jira — Coursera

AI Fundamentals — IBM

Generative AI — Databricks

BI & Data Reporting — NetSuite

TECHNICAL SKILLS

AI & Automation: Claude · ChatGPT · N8N · Together.AI · GPT agents · LLM integration · AI IVR · Power Automate · Zapier

Platforms: Salesforce · Bullhorn · Avionte · Asymbl · Ironclad · NetSuite · Sage Intacct · MS Dynamics · PrismHR · ADP Workforce Now · Workday · HubSpot

Cloud & Infrastructure: Microsoft 365 · Azure · Entra ID · AWS · Google Workspace · SharePoint

ITSM & Endpoint: Jira Service Management · ServiceNow · NinjaOne · SentinelOne · Sophos · VPN · MSSP

Data & Reporting: Power BI · Tableau · Bullhorn Canvas · SQL Server · Crystal Reports · IBM Cognos

Security & Compliance: Cloud Security · GDPR · PCI DSS · API Management
