

Jamie Butler

Technology Leader | Strategy · Architecture · Transformation

Texas, US | jamiadambutler@icloud.com | (951) 768-4008 | [linkedin.com/in/jamiadambutler](https://www.linkedin.com/in/jamiadambutler)

Value Proposition

Organizations bring Jamie in when managing technology isn't enough. What they need is someone who can take a fragmented operational environment and build the infrastructure that lets it run the way it was meant to. He works where executive strategy and technical architecture meet, a rare combination in technology leadership, which lets him translate vision directly into systems that deliver.

What he leaves behind isn't just a modernized stack. It's an operational foundation with the architecture, governance, and automation in place so the organization can grow without growing its complexity.

Core Capabilities

Enterprise Platform Migrations CRM, ATS, HRIS, ERP, and CLM, scoped and delivered without disrupting the business.	Cloud & Identity Microsoft 365, Azure, and Entra identity governance built to scale.
AI & Automation GPT agents, Power Automate pipelines, and AI IVR embedded across operations.	Systems Integration APIs and data pipelines connecting ATS to payroll to ERP into one environment.
Security & Governance MSSP programs, endpoint protection, and policy frameworks built from the ground up.	Executive Reporting Power BI, Tableau, and integrated pipelines so leadership sees the business clearly.

Jamie is pursuing technology leadership and senior individual contributor roles, remote-first, where the mandate is real transformation rather than maintenance. He does his best work in organizations ready to run differently, where systems are fragmented and leadership is ready to build the foundation that defines the next decade.
