PROJECT PORTFOLIO

A career timeline of enterprise technology initiatives — most recent first.

2024 – Present

Senior Director of Technology · Latitude Legal

Enterprise Salesforce Transformation (Bullhorn to Salesforce)

Led the largest technology transformation in Latitude Legal's history — a full enterprise migration from Bullhorn to Salesforce consolidating recruiting, business development, contract lifecycle, marketing, and candidate experience into a single unified ecosystem. Architected the Salesforce platform from the ground up — custom object design, schema customization, field-level permissions, governance framework, and Salesforce Flow automations. Built the Experience Cloud candidate portal, integrated Ironclad CLM, HubSpot marketing, Jira, and Slack, and designed AI-powered candidate matching using Salesforce AI and custom GPT agents. Managed onshore, nearshore, and offshore development teams; owned end-to-end change management, RevOps reporting, and executive stakeholder communication. April 2025 – December 2025.

M365 Tenant Migration

Architected and executed company-wide migration from hosted Exchange to Microsoft 365 — designed tenant structure, permissions model, security policies, and governance framework from the ground up for a 150–500 user organization.

SharePoint Intranet

Migrated organization from Dropbox to SharePoint — built department-level intranet sites organizing all documents, resources, and workflows by team, improving accessibility and reducing information silos across the business.

Contract Lifecycle Automation

Consolidated DocuSign to Adobe Sign, then led full migration to Ironclad (CLM) with native Salesforce integration — automating contract signature workflows that were previously a major manual slowpoint for talent and business development teams.

AI Productivity Platform

Deployed AI meeting transcription, internal AI chat tools, custom knowledge assistants, and AI-powered GPT agents across teams — reducing administrative overhead and accelerating institutional knowledge access organization-wide.

Power Automate Onboarding

Built a complex multi-path Microsoft Forms and Power Automate onboarding system — routing hire information by type to the correct teams, adding tasks to a shared HR Microsoft Planner board, and solving a critical operational bottleneck during rapid hiring scale-up.

Zoom Phone AI IVR

Replaced Dialpad and an expensive third-party answering service with Zoom Phone and a fully automated AI IVR — reducing telecom costs significantly while improving communication quality, uptime, and client routing workflows.

Cybersecurity & MSSP

Researched, vetted, and deployed a dedicated MSSP with endpoint protection and VPN rollout — establishing formal cybersecurity governance policies and significantly strengthening the organization's security posture.

Jira Cloud & JSM

Implemented Jira Cloud and Jira Service Management — establishing a structured technology support framework with request tracking, SLA management, automated workflows, and full operational visibility across the technology function.

M&A Systems Integration

Led technology integration across four post-acquisition initiatives — unifying platforms, data, and workflows from newly acquired entities into the parent organization's enterprise architecture without disrupting client-facing operations.

2022 – 2024

Vice President of Technology · AlliedUP Cooperative Inc.

ATS & CRM Consolidation

Consolidated BlueSky ATS and Salesforce CRM into a unified Bullhorn platform — eliminating data silos, moving recruiters off spreadsheets into a fully managed end-to-end ATS, and giving business development a dedicated CRM for the first time.

Canvas Reporting Platform

Built complex Bullhorn Canvas reporting dashboards with detailed operational analytics — improving hiring visibility, pipeline performance measurement, and leadership decision-making across the organization.

HRIS & Payroll Transformation

Implemented ADP Workforce Now with integrated benefits administration — improving HR, payroll, and employee data accuracy and compliance across a distributed clinical staffing workforce.

Compliance Vendor Integration

Integrated AccuSource background screening directly into Bullhorn recruiting workflows with automated pass-through to ADP Workforce Now for PEO onboarding — eliminating manual handoffs and improving clinical compliance consistency.

Executive & Board Reporting

Built automated KPI reporting pipelines for leadership, board members, and external grant stakeholders — replacing manual data extraction with real-time operational visibility into hiring, performance, and organizational metrics.

VoIP Infrastructure Migration

Migrated telephony infrastructure from a legacy platform to Zoom Phone — reducing telecom operating costs while improving call quality, reliability, and scalability across the distributed workforce.

Technology Budget Ownership

Owned a \$1M+ technology and operations budget end to end — planning, forecasting, vendor contracts, and purchasing across 8 internal staff, ~5 nearshore engineers, and 10–20 offshore developers.

2014 – 2022

Director of Information Services · EOSG Resources, LLC

ERP Migration — Oracle to Dynamics

Led Oracle E-Business to Microsoft Dynamics migration — the organization's most complex technology initiative, encompassing payroll integrations, financial reporting improvements, and cross-department data alignment across the enterprise.

ERP Migration — NetSuite to Intacct

Directed NetSuite to Sage Intacct migration — implementing automated financial reporting, improving accounting operations, and delivering executive-level dashboards that reduced month-end close complexity.

ATS Modernization

Replaced Avionté ATS with Bullhorn — improving recruiting workflows, pipeline visibility, and KPI reporting for leadership and operations teams across the recruiting function.

HRIS & Payroll Migration

Migrated HR and payroll systems to PrismHR — improving operational data sharing between recruiting, HR, and finance departments and reducing processing errors across the business.

Systems Integration Architecture

Designed end-to-end integrations between ATS, payroll, and ERP systems — creating a continuous automated data pipeline from recruiting through financial reporting, eliminating manual data transfer between departments and supporting ~900 active clients.

Process Mapping & SOPs

Conducted company-wide workflow analysis and built standardized operational frameworks across recruiting, sales, and finance — establishing the process infrastructure that supported sustained headcount and client growth over eight years.

Internal MSP Function

Built an internal MSP function supporting field-services clients — providing CTO-level technology advisement, infrastructure management, and operational technology guidance across a distributed client base.

2013 – 2014

Interim Director of Technology · Oreq Corporation

ERP Implementation — Macola

Brought in on contract to lead the technology function. Led full Macola ERP migration — connected manufacturing, procurement, and logistics into a unified reporting system with executive dashboards built from the ground up.

Remote Department Deployment

Scaled and deployed a remote business development department — built the technical infrastructure supporting distributed sales operations that contributed directly to company growth.

Manufacturing Time-Tracking

Partnered with operations and production leadership to implement a floor time-tracking system — addressing turnover-driven bottlenecks and improving production process consistency.

2006 – 2013

Engineering & IT Manager · Cannon Fabrication, Inc.

ERP Implementation — Sage MAS 300

Led full ERP implementation from a legacy DOS-based accounting system to Sage MAS 300 — owned vetting, requirements gathering, implementation, data migration, and post-migration cleanup across a manufacturing and distribution operation.

KPI Dashboard Platform

Built integrated KPI dashboards combining ERP, CRM, and production data — giving leadership cross-functional real-time visibility into business performance across manufacturing, distribution, and financial operations.

Engineering Platform Migration

Led migration of the engineering department from AutoCAD to SolidWorks — modernizing the design and manufacturing toolset and improving cross-functional alignment with production.

2005 – 2006

Senior Data Analyst & IT Manager · Casablanca Fan Company (acq. Hunter Fan)

Executive Reporting Platform

Developed complex cross-functional dashboards and custom reports surfacing sales performance, operational data, and business KPIs — presented directly to leadership in regular performance review meetings.

Cybersecurity & Compliance

Managed cybersecurity configuration, software auditing, data integrity, and compliance across the technology environment — reducing technology expenses while increasing productivity organization-wide.

2005

Business Analyst · Anchor Blue Retail Group

Inventory Management System

Contributed to implementation of a \$1M inventory management and tracking system across all retail locations — supporting multi-location retail operations at enterprise scale.

POS & Ticketing Systems

Developed internal store database POS system and built the organization's internal IT support ticketing system from the ground up.

2003 – 2005

Network & Systems Administrator · ITT Technical Institute

Proprietary Grade Database

Designed and built a custom proprietary database for student grade tracking and administration — replacing a fully manual process with a structured internal system used across the campus.

Campus Network Migration

Led network hardware migration to new infrastructure and location — maintaining continuity across student and faculty environments while managing Active Directory, Cisco routing, VPN, and Linux storage administration.

Foundation of a 20+ year technology career
